

BYPASS DRYLICK + RUMENSIN™

- BYPASS DRYLICK + R is a low cost drylick for cattle on a low quality, roughage diet. Plenty of roughage is essential.
- BYPASS DRYLICK + R is a supplement designed to feed the rumen bugs and stimulate feed intake.
- BYPASS DRYLICK + R contains RUMENSIN™ which increases the efficiency of energy available from all the feed consumed by the animal by approximately 10%.

Ingredients

Vegetable protein meals, lime, salt, sulphate of ammonia, urea, vitamin and mineral premix and RUMENSIN™

Analysis

Crude Protein.....	16%MIN
NPN Protein Equivalent.....	32%MIN
	TOTAL 48%
Crude Fibre.....	9%
Metabolisable Energy (Mj/Kg).....	3
Urea.....	10%MAX
Sulphate of Ammonia.....	8%MAX
Salt.....	22%MAX

Rumensin™ is a registered feed ingredient for enhancing productivity by increasing the rate of weight gain and improving feed conversion efficiency of feedlot beef cattle.

Precautions- Ensure Rumensin™ productivity enhancer for cattle is not fed to other animal species as toxicity may occur. Do not exceed the recommended dose rate.

Withholding period NIL

Suitable for all classes of cattle.

**DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL
DO NOT FEED TO NON RUMINANT ANIMALS**

Planned Supplement Intake

	Cattle
Initial period	50-70g/hd/day
On full urea	100-150g/hd/day

Feeding **BYPASS DRYLICK + R**

Cattle

Cut a 200 litre drum in half between the 2 rings to form a vertical side tub. This way if it happens to rain on the supplement the drum will only catch what falls directly in to it, unlike a trough which has a funnel effect.

The half drum should be adequate for approximately 40 adult cows. Adequate number of drums is critical for the distribution of supplement throughout the herd. It is very important to regularly measure the intake of the supplement across the herd.

Rules for using **BYPASS DRYLICK + R**

Urea is toxic if...

- The rumen is not adjusted
- It is not fed **CONSTANTLY**
- It becomes liquefied in a trough or block

Therefore...

1. Start urea intake slowly.
2. Maintain access to the supplement **100% of the time** .
3. Use drums for **BYPASS DRYLICK + R** as explained in the above suggested feeding method.
4. There should be adequate drums available for the number of animals.
5. **Remove any salt cravings before feeding **BYPASS DRYLICK + R**.**

Salt may act either as an intake inhibitor or an attachment. It is important to know which it is before starting **BYPASS DRYLICK + R**. Feed out some straight salt to start with to test the animals reaction. If they really get into the salt, continue until salt cravings are reduced.

Do not feed anything with **BYPASS DRYLICK + R** without first consulting Bypass Stockfeeds on PH:02 6843 1933 or AH: 02 6843 1742
