## BYPASS G + RUMENSIN

- Bypass G + Rumensin is a green feed supplement for sheep and cattle.
- **Helps reduce scouring on green crops or pasture**, and increasing weight gains.
- **Helps prevent bloat on legume pastures.**
- Rumensin increases the efficiency of the energy available from all the feed consumed by the animal.
- Young growing animals obtain the most advantage from this feed, as the protein requirement, for a young animal is higher.

### INGREDIENTS

Formaldehyde treated vegetable protein meals, lime, salt, mineral premix, vegetable oil  
Rumensin TM and dical phosphate

### ANALYSIS

Crude Protein (vegetable protein only).....	21%
Metabolisable energy Mj/Ke .....	7.2
Urea.....	Nil
Salt Max.....	20% max

### SAFETY

Bypass G + Rumensin is safe to use however if mixed with grain the usual precautions of increasing grain slowly apply.

### USAGE SUPPLEMENTARY FEEDING

Cattle → 150 grams per head per day  
Sheep → 10-15 grams per head per day.

CATTLE Withholding period	Nil
SHEEP Withholding period	1 Day
SHEEP Export slaughter interval	7 Days

## FEEDING BYPASS G + R

### **Cattle**

Cut a 200 litre drum in half between the 2 rings to form a vertical sided tub. This way if it happens to rain on the supplement the drum will only catch what falls directly in to it, unlike a trough which has a funnelling effect.

The half drum should be adequate for approximately 40 adult cows. Adequate number of Drum's is critical for the distribution of supplement throughout the herd. It is very important to regularly measure the intake of the supplement across the herd.

### **Sheep**

Cut out one side of a square plastic drum and lay over. This way if it happens to rain on the supplement the drum will only catch what falls directly in to it, unlike a trough which has a funnelling effect. The drum should be adequate for approximately 40 adult sheep.

**RUMENSIN IS NOT REGISTERED FOR GOATS OR DEER  
DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL**
