

BYPASS MID SEASON MIX

BYPASS MID SEASON is a blend of Bypass Drylick + R and Bypass G + R. This product was developed for use when stock 'go off' Drylick + R because of the green pick.

- Use this product when there is a green pick amongst dry feed and when stock cease to consume Drylick + R, as it provides a transition to Bypass G + R
- The use of this product will prevent the rapid weight loss experienced by animals chasing green pick.

INGREDIENTS
