

## BYPASS S + RUMENSIN™ (Supplement)

- BYPASS S is a dual purpose supplement which can be used as a beef feedlot concentrate or as a drylick to supplement cattle on dry feed.
- RUMENSIN™ increases the efficiency of the energy available from all feed consumed by the animal.

### Ingredients

Formaldehyde treated vegetable protein meals, Rumensin™, bentonite lime, salt, vitamin and mineral premix, urea and molasses.

### Analysis

NPN Crude Protein Equivalent.....	12%
	TOTAL 32%
Metabolisable Energy Mj/Kg.....	7.4
Urea.....	5%MAX
Salt.....	5%MAX

**DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL  
DO NOT FEED TO NON RUMINANT ANIMALS**

### Usage

#### Feedlots

Recommended for use in total feedlot rations to ensure maximum growth rates, minimum fat cover and optimum feed conversion rates. BYPASS S is ideal for young trade weight and weaner cattle where protein requirements are high.

Trade cattle                    12%(120Kg/tonne of finished feed)

#### Supplementary feeding

- Recommended as a supplement for dry feed at 500-700g/hd/day mixed with grain and/or roughage.
- Can be fed straight from the bag in to troughs as a drylick. Feed daily for 5 days to accustom the animal to urea, then put out enough for 3 days (number of cattle x rate x days e.g. 20hd x 500g/hd/day x 3 days = 30kgs) then replenish every 4th day. This gives you control of the intake of BYPASS S.

Cattle                    500-750g per head per day  
Sheep                    40-50g per head per day

### Safety

BYPASS S is a safe supplement to use however if mixed with grain the usual precautions of increasing grain slowly apply.

**DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL**
