

BYPASS

Calfstarter

The new era of early weaning

9 weeks, 137 kg, No Milk*

Bypass Calfstarter offers;

- Easy weaning of calves within 7-10 days of birth
- Provides a balanced, high protein & high energy total ration
- Nil meat with-holding period
- Dramatically increases muscle gain and feed conversion efficiency
- Decreases heifer inter-calving interval
- Does not contain restricted animal materials
- Provides optimum levels of essential vitamins and minerals

* The calf pictured had 2-3 days of colostrum before weaning

"Bypass Calfstarter revolutionised my attitude to early weaning of calves, our inter-calving interval decreased dramatically."

- Jeff Chalmers, "Deltriot" NSW

"We raised around 200 calves during the drought, we would have really struggled if not for Bypass Calfstarter"

- Annabelle Murray, "Raheen"

NSW

"We can get bull dairy calves in and ready for the vealer market within 12 weeks using Bypass Calfstarter"

- Graham Blaxland, Newham VIC

Analysis

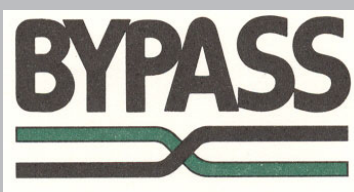

Density (KgM ³)	641	Tryptopane	0.12%
ME/KG (Mj/Kg)	12	Isoleucine	0.45%
