

WEANER RATION

- Diet for early weaning calves 80Kg 100kg
- A high protein, high energy ration. It contains sufficient levels of BYPASS PROTEIN (or UDP) for growth and a protein boost to the fourth stomach, thus allowing manipulation of the protein and energy ratio (more muscle less fat). Other ingredients are cereal grains or sorghum, cereal byproducts, vitamin and mineral premix, lime, salt, vegetable oil, urea, molasses, Rumensin and Acid Buff.

<u>INGREDIENTS</u>

Rolled Wheat, Rolled Oats, Molasses, Canola Meal, CSM, Urea, Lime Salt, Vitamin and Mineral premix, Rumensin, Acid Buff.

Rumensin- is a stockfeed medicine for enhancing productivity by increasing the rate of weight gain and improving feed conversion efficiency of feedlot beef cattle.

Precautions- Ensure rumensin productivity enhancer for cattle fortified feeds are not fed to other animal species as Toxicity may occur.

Rules for Urea

- Start urea intake slowly.
- Maintain access to the supplement 100% of the time

Urea is toxic if...

- The rumen is not adjusted.
- It is not fed CONSTANTLY.
- It becomes liquefied in a trough or block

With Holding Period:.....Meat.....Nil

Store in a cool dry place at room temp.

DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL

Weaner Ration
